

The addition of services from XM radio for the Chicago market are FANTASTIC!!!!!!!!!!!!It makes a complete satellite radio service even better! Competetion is good it's the American way! The NAB needs to get after the radio Monopoly companies and tell to step up the services that they provide. Local radio at one time was what made up the fabric of our lives. It was the information giver, the information pipeline to all of us In Chicago there is only one news radio outlet. It is a good one, but not as good as when thier were two or three of them. They made it that way so now they will have to deal with the reduction of listeners. XM radio and satellite radio gives me the choices I can not find ANYwhere else. Don't let the "boys" wreck what is great.
